

TECHNICAL DATA SHEET

INGREDIENTS:

A natural deodorant and disinfectant, **Activated Charcoal** has an amazing ability to extract and neutralize thousands of times its own weight in gases, toxins, poisons and other chemicals.

Life Force International's **Activated Charcoal** is made by heating coconut shells in the absence of air. The partly-burned shells are then granulated to a size that provides for optimum absorption.

This vegetable form of carbon (an element found in all living matter), is completely safe for human consumption. Long recognized as being particularly helpful in providing relief for trapped gas in the lower intestine, physicians and regulatory agencies also acknowledge charcoal's cleansing and healing properties. Known as the universal antidote, it is used in hospital emergency rooms to neutralize drugs and poisons.

SUGGESTED USE OF ACTIVATED CHARCOAL:

One level teaspoon with water in the morning and evening. People with children should keep a bottle in their Family First Aid Kit. If you are on medication, take **Activated Charcoal** two to three hours before or after your medication.
